ANBARASU A

Infrastructure & Security Operations Engineer
Microsoft 365 | Security Operations | Cloud-Oriented Infrastructure
Kochi, Kerala | +91 7502121617 | anbua401613@gmail.com

PROFESSIONAL SUMMARY

Infrastructure & Security Operations Engineer with **6+ years of experience** across MSP and enterprise environments managing Microsoft 365 ecosystems, endpoint security, backup governance, and distributed infrastructure operations.

Currently supporting 40+ client environments managing 900+ endpoints and 70+ servers, maintaining 97% SLA compliance and 95%+ backup success rate within high-volume monitoring environments (100+ daily alerts/tickets).

Experienced in phishing investigation, compromised account remediation, Microsoft Defender administration, tenant-level mail governance, and client-facing escalation coordination. Reduced phishing simulation click rate by 70% through awareness enforcement and policy optimization.

Currently preparing for AWS Solutions Architect Associate (SAA-C03) to strengthen cloud architecture and infrastructure design expertise.

CORE SKILLS

Microsoft 365 & Identity:
Exchange Online, Mail Flow & Transport Rules, Retention Policies, Shared Mailbox Management, MFA, Conditional Access, Entra ID Sign-in Logs, Session Revocation

Security Operations:
Phishing Header Analysis, Tenant-wide Message Trace, Email Purge, Domain/IP Blocking, Compromised Account Remediation, OAuth Review, Microsoft Defender for Office 365 (Threat Explorer, Quarantine, Anti-Phishing Policies, Secure Score)

Endpoint & Threat Monitoring:
Huntress, Datto EDR, SentinelOne, RocketCyber, Malware Isolation & Remediation Coordination

Backup & Data Protection:
Cove Backup (Endpoint/Server/M365), Datto SaaS Protection, Veeam, PST Export (Purview/Datto), Granular Restore Operations

Infrastructure & Networking:
VPN Troubleshooting (Meraki, FortiGate), Firewall Rule Updates, AD Group Management, VMware Exposure, Addigy MDM

Automation & Reporting:
PowerShell (Bulk Provisioning, License Assignment, Reporting), Exchange Online PowerShell, Graph API (Basic), CSV Bulk Operations, Operational Reporting & SOP Documentation

PROFESSIONAL EXPERIENCE & IMPACT

Infrastructure & Security Operations Engineer
Technagy IT – Kochi | Apr 2024 – Present

- Manage Microsoft 365, security operations, and infrastructure support across 40+ MSP client environments supporting 900+ endpoints and 70+ servers.
- Own tenant-level administration including onboarding/offboarding, license governance, transport rules, retention policies, and Conditional Access validation.
- Investigate phishing incidents using header analysis and tenant-wide message trace; execute email purge, domain/IP blocking, and connection filter updates.

- Lead compromised account remediation including password resets, MFA resets, session revocation, and OAuth validation.
- Monitor Microsoft Defender for Office 365 (Threat Explorer, quarantine review, anti-phishing configuration, Secure Score tracking).
- Perform daily EDR monitoring (Huntress, Datto EDR, SentinelOne) and coordinate endpoint isolation and malware remediation.
- Govern backup health across Cove Backup, Datto SaaS, and Veeam platforms, maintaining 95%+ backup success rate.
- Support Microsoft 365 tenant-to-tenant migration (300+ mailboxes, 5+ TB SharePoint) including permission validation and post-cutover remediation.
- Provide weekend on-call support for P1 security and network alerts, ensuring rapid triage and vendor escalation.
- Maintain 97% SLA compliance in high-volume operational environment (100+ daily monitoring alerts).
- Coordinate directly with Microsoft, Cove, and Kaseya during escalations and outage scenarios, delivering structured client updates.

Security & Governance Contributions

- Reduced phishing simulation click rate by **70%** through awareness enforcement, policy optimization, and user reporting analysis.
- Standardized anti-phishing, mail flow, and backup governance practices across multiple client tenants.
- Created structured SOP documentation across Microsoft 365, security, and backup platforms to improve operational consistency.
- Trained and mentored junior engineers, improving incident response quality and reducing escalation dependency.
- Proactively identified risky sign-ins, unauthorized forwarding rules, and suspicious login patterns to prevent potential data exposure.
- Generated detailed weekly and monthly security, backup, asset, and compliance reports for client review meetings.

Technical Manager

Vedanta Enterprises – Bangalore | May 2018 – Sept 2022

- Managed operations across 20–30 enterprise retail sites under SLA-driven contracts.
- Led team and handling on-site technical issues, hardware lifecycle, and vendor coordination.
- Handled network outages, ISP escalations, CCTV infrastructure, and site-level IT troubleshooting.
- Maintained 95%+ SLA compliance through structured reporting and operational governance.
- Coordinated CAPEX/OPEX planning and ensured uninterrupted technical service delivery.

Sales Executive – Customer Solutions

Reliance Jio | February 2022 – July 2022 *(Short-term role during post-COVID transition period.)*

- Managed customer onboarding and service activations in a target-driven environment.
- Coordinated with technical and backend teams to resolve service-related issues and escalations.
- Handled customer queries and documentation processes, ensuring timely resolution and service continuity.

EDUCATION

B.E. – Electrical & Electronics Engineering
Karpagam College of Engineering – 2018
